		GRADING SCALE				
TRAITS	NEED IMPROVEMENTS 1	FAIR 2	GOOD 3	EXCELLENT 4	WEIGHT	SCORE
DESIGN	Only few design requirements are met.	The design only met some of the requirements and included additional features.	The design met most of the requirements and included some additional features.	The design met all of the requirements and included some additional features.	5	
CODE CONTENT	Only few topics and concepts discussed are implemented in the system code.	The system code implemented some of the topic and concepts discussed.	The system code implemented most of the topic and concepts discussed.	The system code implemented all of the topic and concepts discussed.	5	

EFFICIENCY	The code appears to be patched together.	The code is unnecessarily long.	The code is fairly efficient without sacrificing readability.	The code is extremely efficient without sacrificing readability.	5	
				TOTAL	60	

INSTRUCTION:

Create a registration form using HTML and CSS (its up to you if you want to use bootstrap). You can search anything in the internet to create your own registration form as long as I can see the input tag. In your registration form, I want to see the full name, age, birthday, address, contact number and anything else that you can see in the registration form.

Bring your own laptop per group to present your work in the class. Thank you and happy coding!

Attach your own PDF file **(every group member should turn in his/ her own copy)** as your submission in the assigned task upon turning in using your Google Classroom following the given format above. **(your PDF file should begin with the first page of the given format).**

PROGRAM CODE/SCREENSHOT:

HTML:

```
<!DOCTYPE html>
```

```html
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>Registration</title>
    <link rel="stylesheet" href="style.css">
</head>
<body>

<div class="container">
    <h1 id="title">Registration Form</h1>
    <div class="user-info">

        <label for="fullName" id="fullName">Full Name</label>
